

Individual Coverage Health Reimbursement Arrangement Employer Lowest Cost Silver Plan Premium Look-up Table Data Dictionary

1. Overview of the Individual Coverage Health Reimbursement Arrangement Employer Lowest Cost Silver Plan Premium Look-up Table

The Centers for Medicare & Medicaid Services' (CMS') Center for Consumer Information & Insurance Oversight (CCIIO) publishes the Individual Coverage Health Reimbursement Arrangement (ICHRA) Employer Lowest Cost Silver Plan (LCSP) Premium Look-up Table to help stakeholders access individual market Qualified Health Plans (QHPs) LCSP premium data by geographic location.

The ICHRA Employer LCSP Premium Look-up Table contains data from states with Federally-facilitated Exchanges (FEEs) and State-based Exchanges on the Federal Platform (SBE-FPs). The ICHRA Employer LCSP Premium Look-up Table does not include data from states with State-based Exchanges (SBEs) that do not use HealthCare.gov.

The ICHRA Employer LCSP Premium Look-up Table contains LCSP individual market rates based on an eligible subscriber's age and geographic location. The LCSP is the least expensive individual silver QHP in a geographic area at the lowest age band.

The data originates from issuers' Rates Table templates (Excel-based issuer QHP application form that contains QHP plan premiums) ("Template field") or are generated by CCIIO for processing data ("System-generated field").

This data dictionary describes the variables contained in ICHRA Employer LCSP Premium Look-up Table. Each record reports LCSP age-based rates in a geographic location.

2. Variable Attributes

<i>Variable Name:</i>	BusinessYear [Hidden Field]
<i>Variable Definition:</i>	Year for which plan provides coverage to enrollees
<i>Data Type:</i>	Text
<i>Variable Label:</i>	Business Year
<i>Allowable Values:</i>	2024
<i>Data Source:</i>	System-generated field
<i>Field Name from Data Source:</i>	Business Year
<i>Comments:</i>	N/A

Employer Lowest Cost Silver Plan Premium Look-up Table

Variable Name: StateCode
Variable Definition: Two-character state abbreviation indicating the state where the plan is offered
Data Type: Text
Variable Label: State Code
Allowable Values: All 50 state abbreviations
Data Source: System-generated field
Field Name from Data Source: State Code
Comments: N/A

Variable Name: RatingAreald
Variable Definition: Identifier for the geographic rating area within a state
Data Type: Text
Variable Label: Rating Area ID
Allowable Values: Rating Area n, where n is an integer between 1 and 150
Data Source: Template field
Field Name from Data Source: Rating Area ID
Comments: Each rating area identifier maps to a geographic region within the state (e.g., one or more counties, three-digit zip codes, or metropolitan statistical areas)

Variable Name: CountyName
Variable Definition: The name of a geographical division in a state
Data Type: Text
Variable Label: County Name
Allowable Values: Free Text
Data Source: System-generated field
Field Name from Data Source: County Name
Comments: N/A

Variable Name: FIPSCode
Variable Definition: Five-digit code which uniquely identifies a county within a state
Data Type: Text
Variable Label: FIPS Codes
Allowable Values: FIPS Codes within a state
Data Source: System-generated field
Field Name from Data Source: FIPS Code
Comments: N/A
