## I. Background

The Patient Protection and Affordable Care Act (ACA) established a permanent risk adjustment program<sup>1</sup> to provide payments to health insurance issuers that attract higher-risk enrollees, such as those with chronic conditions, to reduce the incentives for issuers to avoid those enrollees, and to lessen the potential influence of risk selection on the premiums that issuers charge. The risk adjustment program is designed to support issuers offering a wide range of benefit designs that are available to consumers at an affordable premium. Consistent with section 1321(c)(1) of the ACA, the Department of Health and Human Services (HHS) is responsible for operating the program on behalf of any state that does not elect to do so. HHS operated risk adjustment in all 50 states and the District of Columbia in the 2019 and 2020 benefit years.

To ensure the integrity of the HHS-operated risk adjustment program and to validate the accuracy of data submitted by issuers for use in transfer calculations under the state payment transfer formula, the Centers for Medicare & Medicaid Services (CMS) performs risk adjustment data validation in states where the HHS-operated risk adjustment program applies. HHS risk adjustment data validation (HHS-RADV) also ensures that issuers' actuarial risk is reflected in transfers and that the HHS-operated program assesses charges to issuers with plans with lower-than-average actuarial risk while making payments to issuers with plans with higher-than-average actuarial risk.

CMS is publishing the annual report on issuers' HHS-RADV adjustments to risk adjustment transfer results. HHS-RADV results in this report refer to the reissued 2019 benefit year HHS-RADV results and the 2020 benefit year HHS-RADV results released on September 15, 2022, unless otherwise specified.<sup>2</sup> As finalized in the 2020 HHS-RADV Amendments Rule, CMS is transitioning from a prospective application of HHS-RADV results to applying HHS-RADV results to the benefit year being audited for all issuers.<sup>3</sup> To effectuate this transition, the reissued 2019 benefit year HHS-RADV error rates were averaged with the 2020 benefit year HHS-RADV error rates and applied as one HHS-RADV error rate to 2020 benefit year plan liability risk scores and risk adjustment state transfers.<sup>4</sup>

This report sets forth by HIOS ID and state market risk pool the applicable adjustments to 2020 benefit year risk adjustment state transfers based on the averaged 2019 and 2020 benefit year HHS-RADV results. This report displays the 2020 benefit year risk adjustment state transfer

---

<sup>1</sup> See section 1343 of the ACA.

<sup>2</sup> See the Reissued 2019 Benefit Year Department of Health and Human Services Risk Adjustment Data Validation (HHS-RADV) Results and 2020 Benefit Year HHS-RADV Results Memo released on September 15, 2022 at <https://www.cms.gov/files/document/2019-and-2020-hhs-radv-results.pdf>.

<sup>3</sup> See the Amendments to the HHS-Operated Risk Adjustment Data Validation (HHS-RADV) Under the Patient Protection and Affordable Care Act's HHS-Operated Risk Adjustment Program Final Rule; 85 FR 76979 at 77002-77005 (December 1, 2020) (2020 HHS-RADV Amendments Rule).

<sup>4</sup> If an issuer is identified as an outlier in one benefit year and a non-outlier in the other, the HHS-RADV error rate for the benefit year they are a non-outlier will be zero (0) in the averaging of their 2019 and 2020 benefit year error rates. For more information on the exiting issuer policies applicable to 2019 and 2020 benefit year HHS-RADV, see the Patient Protection and Affordable Care Act; HHS Notice of Benefit and Payment Parameters for 2020; Final Rule, 84 FR 17454 at 17503 - 17504 (April 25, 2019) (2020 Payment Notice) and see the 2020 HHS-RADV Amendments Rule, 85 FR 76979 at 76979-77007.

amounts that were provided in the summary report,<sup>5,6</sup> the adjusted transfer amount due to the application of HHS-RADV error rates, and the difference between the amounts that will be collected (if an HHS-RADV charge amount is owed) in 2022 and subsequently paid (if an HHS-RADV payment amount is due), pending collections.

This report also includes information on 2019 benefit year default data validation charges under 45 C.F.R. § 153.630(b)(10) and allocations of those amounts. No issuers received a default data validation charge related to 2020 benefit year HHS-RADV.

Issuers will also receive new issuer-specific transfer reports for the 2020 benefit year on November 16, 2022, reflecting any adjustments to state transfers as a result of the application of the averaged 2019 and 2020 benefit year HHS-RADV results. The data included in these reports reflect amounts calculated based on the applicable methodologies established through notice with comment rulemaking,<sup>7</sup> prior to the resolution of HHS-RADV discrepancies and related appeals, and are provided for informational purposes. These amounts do not constitute specific obligations of Federal funds to any particular issuer or plan.

On September 15, 2022, HHS released the reissued 2019 Benefit Year HHS-RADV and 2020 Benefit Year HHS-RADV results. This included the publication of the Reissued 2019 Benefit Year HHS-RADV Results and 2020 Benefit Year HHS-RADV Results Memo,<sup>8</sup> as well as the release of Issuer-Specific Metrics Reports, Enrollee-Level Metrics Reports, and Average Error Rate Reports to issuers in the HHS-RADV Audit Tool.<sup>9</sup> The Reissued 2019 Benefit Year HHS-RADV Results and 2020 Benefit Year HHS-RADV Results Memo included an overview of the reissued 2019 benefit year HHS-RADV error rate results and the 2020 benefit year HHS-RADV results, including national program benchmarks and the state market risk pool weighted average error rate, and HHS-RADV failure rate group definitions for both the 2019 and 2020 benefit years of HHS-RADV.

## **II. HHS-RADV Summary Data**

In the reissued 2019 benefit year HHS-RADV results, 85 state market risk pools were impacted due to the identification of outliers. In 2020 benefit year HHS-RADV, 78 state market risk pools were impacted due to the identification of outliers. After averaging outlier issuers' 2019 and 2020 benefit year error rates, a total of 102 out of 145 state market risk pools will have 2020 benefit year risk scores and state transfers adjusted due to outlier issuers. This contrasts with the reissued 2018 benefit year HHS-RADV results where only 59 of the 146 state market risk pools

---

<sup>5</sup> The Summary Report on Permanent Risk Adjustment Transfers for the 2020 Benefit Year can be found at: <https://www.cms.gov/sites/default/files/2021-06/RA%20Report%20BY2020.pdf>.

<sup>6</sup> A small number of issuers may have transfer amounts that differ from the summary report, due to late-filed discrepancy adjustments.

<sup>7</sup> See, e.g., the 2019 Payment Notice, 83 FR at 16961 – 16965 and the 2020 HHS-RADV Amendments Rule, 85 FR 76979 at 76998 – 77001.

<sup>8</sup> See *supra* note 2.

<sup>9</sup> The HHS-RADV Audit Tool can be accessed by issuers (issuer SO, back-up SO and RADV coordinators) at: <https://ccrms-rari.force.com/HHSRADVAuditTool/>.

had 2019 benefit year risk scores and state transfers adjusted due to outlier issuers.<sup>10</sup> The averaging of 2019 and 2020 HHS-RADV results, in addition to error estimation methodological changes implemented beginning with 2019 benefit year HHS-RADV,<sup>11</sup> contributed to the increase in the number of state market risk pools being adjusted. We set forth the detailed summary data reflecting the application of the averaged 2019 and 2020 benefit year HHS-RADV results on risk adjustment transfers below. Table 1 also provides a comparison of this data to summary information on HHS-RADV adjustments to 2019 benefit year state transfers.<sup>12</sup> For information on the reissued 2019 benefit year HHS-RADV results and 2020 benefit year HHS-RADV results, please refer to the Reissued 2019 Benefit Year HHS-RADV Results and 2020 Benefit Year HHS-RADV Results Memo.<sup>13</sup>

**Table 1: HHS-RADV Summary Data for Adjustments to 2020 Benefit Year State Transfers and Comparison to HHS-RADV Adjustments to 2019 Benefit Year State Transfers**

	Individual, Non-Catastrophic		Small Group		Merged, Non-Catastrophic		Individual, Catastrophic	
	2020 RA	2019 RA	2020 RA	2019 RA	2020 RA	2019 RA	2020 RA	2019 RA
	with 2019/2020 RADV	with 2018 Reissued RADV	with 2019/2020 RADV	with 2018 Reissued RADV	with 2019/2020 RADV	with 2018 Reissued RADV	with 2019/2020 RADV	with 2018 Reissued RADV

Number of States with Risk	49	49	49	49	2	2	45	46

<sup>10</sup> See the Updated Summary Report of 2018 Benefit Year Risk Adjustment Data Validation Adjustments to Risk Adjustment Transfers released on January 20, 2022 at: <https://www.cms.gov/files/document/updated-by2018-hhsradv-adjustments-ra-transfers-summary-report.pdf>.

<sup>11</sup> See, for example, the application of a sliding scale adjustment beginning with 2019 HHS-RADV finalized in the 2020 HHS-RADV Amendments Rule, 85 FR at 76990 – 76994.

<sup>12</sup> See supra note 10.

<sup>13</sup> See supra note 2.

<sup>14</sup> Total Premium is reduced by 14 percent due to the administrative fee adjustment to statewide average premium in the risk adjustment state payment transfer formula.

	Individual, Non-Catastrophic		Small Group		Merged, Non-Catastrophic		Individual, Catastrophic	
	2020 RA	2019 RA	2020 RA	2019 RA	2020 RA	2019 RA	2020 RA	2019 RA
	with 2019/2020 RADV	with 2018 Reissued RADV	with 2019/2020 RADV	with 2018 Reissued RADV	with 2019/2020 RADV	with 2018 Reissued RADV	with 2019/2020 RADV	with 2018 Reissued RADV
Adjustment Covered Plans <sup>15</sup>								
Number of States with Adjusted Risk Adjustment Transfers Due to HHS-RADV <sup>16</sup>	36	18	39	27	1	1	26	13
Number of States without Adjusted Risk Adjustment Transfers Due to HHS-RADV	13	31	10	22	1	1	19	33
Number of Issuers w/ RADV Adjustment*	239 / 275	130 / 252	389 / 455	293 / 462	13 / 15	13 / 15	113 / 163	64 / 149
Number of Issuers w/RADV Charge*	133	67	209	109	12	12	57	29
Number of Issuers w/RADV Payment*	106	63	180	184	1	1	56	35

\*Counts include issuers with greater than \$0.01 in HHS-RADV adjustments

For the 2020 benefit year, HHS-RADV adjustments as a percent of premiums decreased and remained low for individual non-catastrophic, small group and merged non-catastrophic market

<sup>15</sup> See 45 CFR 153.20 for a definition of “Risk Adjustment Covered Plan”.

<sup>16</sup> These numbers exclude single issuer markets in which the single issuer had a non-zero error rate.

risk pools, on average. For individual catastrophic market risk pools, the value increased. When limiting the analysis to those market risk pools with HHS-RADV adjustments, all four market risk pools decreased on average. Sixteen of the 36 individual non-catastrophic risk pool markets receiving an HHS-RADV adjustment to 2020 benefit year state transfers also received an adjustment to the 2019 benefit year state transfers as a result of the application of 2018 benefit year HHS-RADV results. Among the 39 small group market risk pools and the 26 catastrophic market risk pools receiving HHS-RADV adjustments to 2020 benefit year risk adjustment state transfers, the overlap with the market risk pools whose 2019 benefit year risk adjustment state transfers were impacted by HHS-RADV is 24 and 10, respectively. The number of issuers receiving an HHS-RADV payment remained relatively stable in the small group and merged risk pools across these benefit years, but the number of issuers receiving an HHS-RADV payment increased in the individual non-catastrophic and individual catastrophic risk pools.

### III. Issuer-Specific Adjustments to 2020 Risk Adjustment Transfers Based on the 2019 and 2020 Benefit Year HHS-RADV Results

Below we set forth the 2020 benefit year risk adjustment state transfer amounts that were provided in the June 30, 2021 “Summary Report on Permanent Risk Adjustment Transfers for the 2020 Benefit Year”<sup>17</sup> and the 2020 benefit year risk adjustment state transfer amounts adjusted by the averaged 2019 and 2020 benefit year HHS-RADV results by issuer by state market risk pool. We note that a small number of issuers’ 2020 benefit year risk adjustment transfer amounts have been updated since the publication of the 2020 benefit year risk adjustment summary report due to adjustments made as a result of late-filed discrepancies.<sup>18</sup>

The issuer “Adjustment Amount” represents the difference between issuers’ 2020 benefit year risk adjustment state transfer and the adjusted state transfer amount due to the application of the averaged 2019 and 2020 benefit year HHS-RADV error rates. The Adjustment Amount is the amount that will be collected in calendar year 2022, and subsequently paid, pending collections. The Adjustment Amounts are subject to change due to HHS-RADV actionable discrepancies or successful appeals.

To calculate the issuer “Adjustment Amount,” CMS first applies HHS-RADV error rates to outlier issuers’ plan liability risk scores ( $PLRS_i$ ) using the following formula:

$$AdjPLRS_i = (1 - TotalER_i) * PLRS_i$$

Where

$AdjPLRS_i$  = The plan liability risk score for issuer i after application of the error rate;

$TotalER_i$  = The final error rate for issuer i;<sup>19</sup> and

$PLRS_i$  = The plan liability risk score recorded on EDGE for issuer i.

---

<sup>17</sup> See supra notes 5 and 6.

<sup>18</sup> See supra note 5. Risk adjustment transfer amounts announced in the applicable benefit year’s summary report are subject to change based on late-filed actionable discrepancies, as well as successful appeals.

<sup>19</sup> An explanation of how  $TotalER_i$  is calculated for each issuer is described in the Reissued 2019 Benefit Year HHS-RADV Results and 2020 Benefit Year HHS-RADV Results Memo available at <https://www.cms.gov/files/document/2019-and-2020-hhs-radv-results.pdf>.

The application of HHS-RADV error rates to outlier issuers' risk scores affects the state average risk score for a state market risk pool, which is used in the recalculation of state transfers to determine HHS-RADV adjustment payments or charges. Therefore, the effect of one or more issuers' error rate(s) on risk scores affects other issuers' risk adjustment state transfer calculations in that state market risk pool. Issuers without HHS-RADV error rates will not receive an adjustment to their EDGE  $PLRS_i$ , but those issuers could be subject to risk adjustment transfer adjustments if there are other issuers that are HHS-RADV outliers (i.e., have HHS-RADV error rates) in their state market risk pools.

Once CMS calculates each plan's adjusted risk score ( $AdjPLRS_i$ ), CMS recalculates the transfer amounts under the state payment transfer formula using the adjusted risk scores for outlier issuers to calculate an adjusted transfer amount that is aggregated at the issuer level. The Adjustment Amount is calculated by taking the difference between each issuer's HHS-RADV adjusted transfer amount and the 2020 benefit year risk adjustment state transfer amount provided in the summary report.<sup>20</sup>

If an issuer does not have enrollment in a state market risk pool, and thus, does not have a risk adjustment transfer in that risk pool, the issuer is not included in the applicable risk pool table(s) below. We signify \$0.00 for issuers where there is no adjustment being made because there are no error rates in the state market risk pool.

**Table 2a: Issuer-Specific 2019 and 2020 HHS-RADV Adjustments to 2020 Risk Adjustment Transfers for Individual, Non-Catastrophic Market Risk Pool (Appendix A)**

#### IV. Issuer-Specific 2019 and 2020 HHS-RADV Adjustments to 2020 Risk Adjustment Transfers for Merged Market States

For the 2019 and 2020 benefit years, Vermont and Massachusetts were the only states considered to have merged markets for purposes of the HHS-operated risk adjustment program.<sup>21</sup>

We signify \$0.00 for issuers where there is no adjustment being made because there are no error rates in the state market risk pool.

**Table 3: Issuer-Specific 2019 and 2020 HHS-RADV Adjustments to 2020 Risk Adjustment Transfers for Merged Market Risk Pool (Appendix B)<sup>22</sup>**

<sup>21</sup> See the “Merged Markets for Risk Adjustment Purposes Only” Memo released on March 1, 2018, at: [https://www.regtap.info/uploads/library/RA\\_GuidanceMergedMarkets2018\\_030118\\_5CR\\_030118.pdf](https://www.regtap.info/uploads/library/RA_GuidanceMergedMarkets2018_030118_5CR_030118.pdf).

<sup>22</sup> Massachusetts and Vermont were considered to have a merged market for purposes of the risk adjustment program for the 2019 and 2020 benefit years. See supra note 21.

**V. Exiting Issuers and Issuer-Specific Adjustments to 2019 Benefit Year Risk Adjustment Transfers Based on 2019 Benefit Year HHS-RADV Results**

There were no exiting issuers with a positive error rate in benefit year 2019 HHS-RADV.<sup>23</sup> Therefore, no adjustments will be made to 2019 benefit year risk scores and risk adjustment transfer amounts as a result of 2019 benefit year HHS-RADV.

---

<sup>23</sup> See supra note 2.

## VI. Default Data Validation Charge

Pursuant to 45 C.F.R. § 153.630(b)(10), HHS will assess a default data validation charge if an issuer of a risk adjustment covered plan fails to engage an initial validation auditor or submit the results of an initial validation audit to HHS.

For the 2019 benefit year HHS-RADV, two issuers were assessed a default data validation charge. For the 2020 benefit year HHS-RADV, no issuers were assessed a default data validation charge. As such, this report only provides issuer-specific tables related to the 2019 benefit year HHS-RADV default data validation charge and allocation. HHS will collect and distribute the 2019 benefit year default data validation charges and payment allocations on the same cycle as the HHS-RADV adjustments to 2020 benefit year risk adjustment state transfers, beginning with collection of charge amounts in the 2022 calendar year.

The default data validation charge generally utilizes the same calculation methodology as the risk adjustment default charge.<sup>24</sup>

The total default data validation charge for a risk adjustment covered plan equals a per-member per-month (PMPM) amount multiplied by the plan's enrollment – either provided by the issuer or sought from other reliable sources when issuer-reported data is not available. HHS will use enrollment numbers from the benefit year being audited for purposes of calculating the default data validation charge. The PMPM charge for a plan is equal to the product of the statewide average premium PMPM for a risk pool and the national 90th percentile plan risk transfer amount for the benefit year of risk adjustment data validation, expressed as a percentage of the respective statewide average PMPM premiums for the risk pool. The nationwide percentile only reflects plans in states where HHS is operating the risk adjustment program and is calculated based on the absolute value of plan risk adjustment state market risk pool transfer amounts. The determined PMPM amount is then multiplied by the noncompliant plan's enrollment to establish the plan's total default data validation charge.

All compliant and exempt risk adjustment covered plans in the state market risk pool of at least one noncompliant issuer will receive a portion of the default data validation charges collected from the noncompliant issuer(s). We allocate default data validation charges collected from noncompliant plans in the state market risk pool among the compliant and exempt plans in the state market risk pool in the applicable benefit year in a manner that is proportional to each compliant or exempt plan's relative revenue requirement, as calculated under the state payment transfer formula relative to the market average of these products.<sup>25</sup> For the 2019 benefit year HHS-RADV, the default data validation charge uses 2019 benefit year risk adjustment data.

---

<sup>24</sup> The default data validation charge is calculated in the same manner as the risk adjustment default charge under 45 C.F.R. § 153.740(b) except that the default data validation charge is based on enrollment for the benefit year being audited. See the 2020 Payment Notice, 84 FR at 17495 – 17497.

<sup>25</sup> See the 2020 Payment Notice, 84 FR at 17495 – 17497.

## VII. HHS-Operated Risk Adjustment Program State-Specific Data (*Appendix E*)

In *Appendix E*, we set forth the risk adjustment state averages after application of the averaged 2019 and 2020 benefit year HHS-RADV error rate with billable member months for the 2020 benefit year. *Appendix E* includes the following data elements after application of the averaged 2019 and 2020 benefit year HHS-RADV error rate: state average monthly premiums by state market risk pool (catastrophic, individual non-catastrophic, small group, and merged), the state average plan liability risk score by state market risk pool, state average allowable rating factor by state market risk pool, state average actuarial value by state market risk pool, state average induced demand factor by state market risk pool, and billable member months for each respective benefit year. We note that some data elements in *Appendix E* have been updated to reflect material late-filed discrepancies after the original publication of 2020 benefit year risk adjustment transfers and state averages.<sup>26,27</sup> We also provide a description below of the calculations for state average premium, state average plan liability risk score, state average allowable rating factor, state average actuarial value, state average induced demand factor, and billable member months.

DATA ELEMENT	DESCRIPTION
<b>State Average Monthly Premium</b>	The state average premium for state market risk pool is the weighted average monthly premium for the state market risk pool, weighted by plan share of statewide enrollment in the state market risk pool. Beginning in the 2018 benefit year, a 14 percent administrative cost adjustment is applied to the state average monthly premium. This value is used in the state payment transfer formula calculations for risk adjustment payments and charges.
<b>State Average Monthly Premium Before Adjustment</b>	The state average premium for state market risk pool is the weighted average monthly premium for the state market risk pool, weighted by plan share of statewide enrollment in the state market risk pool before the 14 percent administrative cost adjustment is applied. This value is for informational purposes only and not used in the calculation of risk adjustment payments and charges.
<b>State Average Plan Liability Risk Score (PLRS)</b>	The state average PLRS is calculated as the summed products of PLRS and billable member months for all plans within the state market risk pool divided by total billable months for all plans within the state market risk pool.
<b>State Average Plan Liability Risk Score After RADV</b>	The state average PLRS after RADV is calculated as the summed products of PLRS with RADV error rates applied and billable member months for all plans within the state market risk pool divided by total billable months for all plans within the state market risk pool.
<b>State Average Allowable Rating Factor (ARF)</b>	The state average ARF is calculated as the summed products of ARF and billable member months for the plans within the state market risk pool divided by total billable member months for all plans in the state market risk pool.

<sup>26</sup> See supra note 5.

<sup>27</sup> State risk pool averages are generally subject to change based on late-filed actionable discrepancies, as well as successful appeals.

DATA ELEMENT	DESCRIPTION
<b>State Average Actuarial Value (AV)</b>	<p>The state average AV is calculated as the summed products of AV and billable member months for the plans within the state market risk pool divided by the total billable member months within the state market risk pool. AV corresponds with metal and catastrophic tiers as follows:</p> <ul style="list-style-type: none"> <li>* Catastrophic: 0.57</li> <li>* Bronze: 0.60</li> <li>* Silver: 0.70</li> <li>* Gold: 0.80</li> <li>*Platinum: 0.90</li> </ul>
<b>State Average Induced Demand Factor (IDF)</b>	<p>The state average IDF is calculated as the summed products of IDF and billable member months for the plans within the state market risk pool divided by the total billable member months within the state market risk pool. IDF corresponds with metal and catastrophic tiers as follows:</p> <ul style="list-style-type: none"> <li>*Catastrophic: 1.00</li> <li>*Bronze: 1.00</li> <li>*Silver: 1.03</li> <li>*Gold: 1.08</li> <li>*Platinum: 1.15</li> </ul>
<b>Billable Member Months</b>	<p>Billable member months are the member months of an individual or family policy that are included when setting the policy's premium rate.</p>
