I. Background

The Patient Protection and Affordable Care Act (PPACA) established a permanent risk adjustment program¹ to provide payments to health insurance issuers that attract higher-risk enrollees, such as those with chronic conditions, to reduce the incentives for issuers to avoid those enrollees, and to lessen the potential influence of risk selection on the premiums that issuers charge. The risk adjustment program is designed to support issuers offering a wide range of benefit designs that are available to consumers at an affordable premium. Consistent with section 1321(c)(1) of the PPACA, the Department of Health and Human Services (HHS) is responsible for operating the program on behalf of any state that does not elect to do so. HHS operated risk adjustment in all 50 states and the District of Columbia in the 2017 benefit year.

To ensure the integrity of the HHS-operated risk adjustment program and to validate the accuracy of data submitted by issuers for use in transfer calculations, the Centers for Medicare & Medicaid Services (CMS) performs risk adjustment data validation in states where the HHS-operated program applies (HHS-RADV). HHS-RADV also ensures that issuers' actual actuarial risk is reflected in transfers and that the HHS-operated program assesses charges to issuers with plans with lower-than-average actuarial risk while making payments to issuers with plans with higher-than-average actuarial risk.

CMS is publishing this first annual report on issuers' HHS-RADV adjustments to risk adjustment transfer results.² As the first non-pilot year, the 2017 benefit year HHS-RADV results will generally be used to adjust 2018 benefit year plan liability risk scores, resulting in adjustments to 2018 benefit year risk adjustment transfer amounts.³ The one exception to the prospective application of HHS-RADV results is for exiting issuers,⁴ whose 2017 HHS-RADV results will be used to adjust the issuers' 2017 benefit year risk adjustment plan liability risk scores, resulting in adjustments to 2017 benefit year risk adjustment transfer amounts in affected state

¹ See section 1343 of the PPACA.

² CMS conducted two (2) pilot years for HHS-RADV for the 2015 and 2016 benefit years. The results of 2015 and 2016 benefit year HHS-RADV were not applied to adjust plan liability risk scores or risk adjustment transfers. In addition, 2017 benefit year HHS-RADV is a pilot year for Massachusetts issuers; therefore, these issuers' 2017 benefit year HHS-RADV results will not be applied to risk scores or transfers. See the HHS Notice of Benefit and Payment Parameters for 2020 (2020 Payment Notice), 84 FR 17454 at 17508 (April 25, 2019).

³ 45 C.F.R. § 153.350(b) and (c).

⁴ To be an exiting issuer, the issuer has to exit all of the market risk pools in the state (that is, not selling or offering any new plans in the state). If an issuer only exits some market risk pools in the state, but continues to sell or offer plans in others, it is not an exiting issuer. A small group issuer with off-calendar year coverage, who exits the small group market risk pool and only has small group carry-over coverage that ends in the next benefit year, and is not otherwise selling or offering new plans in any market risk pools in the state, would be an exiting issuer. See the 2020 Payment Notice, 84 FR at 17503.

market risk pools.⁵ This report sets forth by HIOS ID and state market risk pool the applicable adjustments to 2018 and 2017 benefit year risk adjustment transfers based on the 2017 benefit year HHS-RADV results. This report displays the 2018 and 2017 benefit year risk adjustment transfer amounts that were provided in each year's respective summary report,^{6,7} the adjusted transfer amount due to the application of HHS-RADV error rates, and the difference between the amounts that will be charged and paid in 2021. This report also includes information on 2017 benefit year default data validation charges under 45 C.F.R. § 153.630(b)(10) and allocations of those amounts. Issuers will also receive new issuer-specific transfer reports for the 2018 and 2017 benefit years on August 1, 2019, reflecting whether or not any adjustments to transfers occurred as a result of the 2017 benefit year HHS-RADV. The data included in these reports reflect amounts calculated based on the applicable methodologies established through notice with comment rulemaking,⁸ prior to the resolution of all HHS-RADV discrepancies and related appeals, and are provided for informational purposes. These amounts do not constitute specific obligations of Federal funds to any particular issuer or plan.

The HHS-RADV error rate is calculated based on the methodology set forth in the 2019 Payment Notice, and is calculated by using failure rates specific to hierarchical condition categories (HCC) groups and subsequently adjusting the issuer's risk score when the issuer's failure rate for a group of HCCs is statistically different from the weighted mean failure rate, or total failure rate, for that group of HCCs for all issuers who participated in the HHS-RADV process.⁹ The HHS-RADV error rate represents the percent of an issuer's EDGE risk scores that are estimated to be in error after applying risk score adjustments to sampled enrollees identified as outliers in the HCC Groups and extrapolating the impact of those adjustments to the issuer's risk adjustment population.¹⁰

On May 31, 2019, HHS released the 2017 Benefit Year Risk Adjustment Data Validation (HHS-RADV) Final Results Report Suite. These reports included the publication of the HHS-RADV 2017 Benefit Year Final Results Memo,¹¹ as well as the release of Issuer-Specific Metrics Reports and Enrollee-Level Metrics Reports to issuers in the HHS-RADV Audit Tool. These reports included an overview of the 2017 benefit year HHS-RADV error rate results by providing the national program benchmarks, the estimated

⁵ See the HHS Notice of Benefit and Payment Parameters for 2019 (2019 Payment Notice), 83 FR 16930 at 16965 (April 17, 2018).

⁶ The Summary Report on Permanent Risk Adjustment Transfers for the 2018 Benefit Year can be found at: <https://www.cms.gov/CCIIO/Programs-and-Initiatives/Premium-Stabilization-Programs/Downloads/Summary-Report-Risk-Adjustment-2018.pdf>.

⁷ The Summary Report on Permanent Risk Adjustment Transfers for the 2017 Benefit Year can be found at: <https://downloads.cms.gov/cciio/Summary-Report-Risk-Adjustment-2017.pdf>.

⁸ See, e.g., the 2019 Payment Notice, 83 FR at 16961 – 16965, and the 2020 Payment Notice, 84 FR at 17495 – 17497.

⁹ See the 2019 Payment Notice, 83 FR at 16961 – 16965.

¹⁰ For additional detail related to the calculation of the HHS-RADV error rate, please refer to the HHS-RADV 2017 Benefit Year Protocols document, available in the REGTAP Library.

¹¹ The 2017 Benefit Year HHS-RADV Results can be found at: <https://www.cms.gov/CCIIO/Programs-and-Initiatives/Premium-Stabilization-Programs/Downloads/2017-Benefit-Year-HHS-Risk-Adjustment-Data-Validation-Resultspdf.pdf>.

weighted risk score error rates by state market risk pool, HCC group definitions and issuer-specific error rate results from the 2017 benefit year HHS-RADV findings. In the HHS-RADV 2017 Benefit Year Final Results Memo, we predicted 85 issuers were exiting issuers. Of those 85 issuers, 27 were expected to be outliers and would have their 2017 benefit year RADV error rates applied to 2017 benefit year risk adjustment transfers. However, since releasing the May reports, we determined that only 81 issuers exited all market risk pools in the applicable state(s) in the 2018 benefit year. Of those 81 issuers, 24 are outliers and their 2017 benefit year HHS-RADV error rates have been applied to 2017 benefit year risk adjustment transfers in the affected state market risk pools. Otherwise, this report builds on the error rate results released in the May reports by applying those error rates to plan liability risk scores and recalculating risk adjustment transfers.

In the 2020 Payment Notice,¹² CMS updated the timeline for publication, collection, and distribution of HHS-RADV adjustments to risk adjustment transfers. Under the new schedule, CMS will delay the collection and distribution of the 2017 benefit year HHS-RADV adjustments to risk adjustment transfers and 2017 benefit year default data validation charges and payment allocations until the 2021 calendar year. The purpose of delaying the collection and distribution of the 2017 benefit year HHS-RADV adjustments to risk adjustment transfers until 2021 is to provide issuers with more options on how and when to account for financial impacts from HHS-RADV, in keeping with guidance from state departments of insurance, where applicable. To allow for these options, we updated the Unified Rate Review Template (URRT) instructions¹³ to permit issuers and states to consider HHS-RADV adjustment impacts on rates for the year when these amounts will be collected and disbursed (for example, issuers and states would have the option to consider the 2017 benefit year HHS-RADV adjustments in rate setting for the 2021 benefit year, instead of 2020 benefit year rate setting). We also updated the Medical Loss Ratio (MLR) Form Instructions for the 2018 Reporting Year to instruct issuers to report HHS-RADV adjustments and default data validation charges and payment allocations in the same MLR reporting year as the year when these amounts are collected and disbursed (for example, the 2017 benefit year HHS-RADV adjustments to risk adjustment transfers and 2017 default data validation charges and allocations would be reported in the 2021 MLR reporting year).¹⁴ Additionally, this delay allows more time for HHS to work with issuers to resolve any HHS-RADV discrepancies and appeals, as a successful HHS-RADV appeal could affect the calculated risk score error rate and accompanying adjustments to transfers. The 2018 benefit year risk adjustment transfers (the amounts noted in the June 28, 2019 Summary Report) will be charged and paid on the same schedule as prior years – that is, 2018 benefit year risk adjustment invoices will be sent in August 2019 and payments will begin in September 2019.

¹² See 84 FR at 17506 – 17508.

II. HHS-RADV Summary Data

Under the methodology finalized in the 2019 Payment Notice, 2017 benefit year HHS-RADV results in only 59 of 146 state market risk pools having 2018 benefit year risk scores and transfers adjusted due to outlier issuers, and 29 of the 149 state market risk pools having 2017 benefit year risk scores and transfers adjusted due to exiting outlier issuers. This is in contrast to the adjustments that would have occurred in all state market risk pools under the methodology finalized in the HHS Notice of Benefit and Payment Parameters for 2015 (2015 Payment Notice) (79 FR 13743) (March 11, 2014).¹⁵ Below we set forth the detailed summary of the application of the 2017 HHS-RADV results on risk adjustment transfers. For information on the 2017 benefit year HHS-RADV error rate results, please refer to the May 31, 2019 HHS-RADV 2017 Benefit Year Final Results Memo.¹⁶

¹⁵ Under the methodology finalized in the 2015 Payment Notice, every failure to validate an HCC would have resulted in an adjustment to the issuer's risk score and would have affected transfers for all issuers in the state market risk pool (including both issuers with HCC validation failures and those without) due to the budget neutral nature of the HHS-operated program.

¹⁶ Available at: <https://www.cms.gov/CCIIO/Programs-and-Initiatives/Premium-Stabilization-Programs/Downloads/2017-Benefit-Year-HHS-Risk-Adjustment-Data-Validation-Resultspdf.pdf>.

Table 1: HHS-RADV Summary Data¹⁷

SUMMARY DATA ELEMENT	2018 Benefit Year Risk Adjustment Individual		2018 Benefit Year Risk Adjustment Small Group		2018 Benefit Year Risk Adjustment Catastrophic		2017 Benefit Year Risk Adjustment Individual		2017 Benefit Year Risk Adjustment Small Group		2017 Benefit Year Risk Adjustment Catastrophic	
	Count	Percentage	Count	Percentage	Count	Percentage	Count	Percentage	Count	Percentage	Count	Percentage
Number of Issuers with Risk Adjustment Covered Plans that Participated in 2017 HHS-RADV	258	100.00%	473	100.00%	142	100.00%	391	100.00%	515	100.00%	176	100.00%
Number of Issuers with Adjusted Risk Adjustment Transfers Due to 2017 HHS-RADV	127	49.22%	329	69.56%	58	40.85%	161	41.18%	130	25.24%	47	26.70%
Number Issuers without Adjusted Risk Adjustment Transfers Due to 2017 HHS-RADV	131	50.78%	144	30.44%	84	59.15%	230	58.82%	385	74.76%	129	73.30%

Number of States without Adjusted Risk Adjustment Transfers Due to 2017 HHS-RADV	33	64.71%	18	36.73%	36	78.26%	36	70.59%	41	83.67%	43	87.76%

III. Issuer-Specific Adjustments to 2018 Risk Adjustment Transfers Based on the 2017 Benefit Year HHS-RADV Results

Below we set forth the 2018 benefit year risk adjustment transfer amounts adjusted for the 2017 benefit year HHS-RADV results by issuer by state market risk pool. The “Adjustment Amount” represents the amount that issuers will be charged or paid as a result of the 2017 benefit year HHS-RADV results being applied to the issuers’ risk adjustment transfers.

Except for exiting issuers, the 2017 HHS-RADV error rates were applied to the 2018 benefit year plan level risk scores which then were used to calculate the adjusted 2018 risk adjustment transfers. Therefore, except for exiting issuers, we applied the 2017 HHS-RADV error rates by completing the following:

1. $RADV \text{ Error Rate} * BY2018 \text{ Risk Score without RADV Adjustment} = X$
2. $BY2018 \text{ Risk Score without RADV Adjustment} - X = BY2018 \text{ Risk Score with RADV Adjustment}$

¹⁷ These numbers include the merged markets of Massachusetts and Vermont in the counts for the individual markets. As described in this report, 2017 benefit year HHS-RADV is a pilot year for Massachusetts issuers and Table 3 separately provides the issuer-specific information for Vermont issuers.

Then, we used the new risk scores (BY2018 Risk Score with RADV Adjustment) in the transfer calculation to determine the RADV adjusted transfer amount. Please see the July 23, 2019 webinar titled, “EDGE Server 32.0 Maintenance Release Preview & Review of 8/1/19 Risk Adjustment (RA) Reports with RA Data Validation (RADV) Adjustments to Transfers,” for more information.¹⁸

The Adjustment Amount represents the difference between issuers’ risk adjustment transfer and the adjusted transfer amount due to the 2017 benefit year HHS-RADV. The Adjustment Amount is the amount that will be collected and paid in calendar year 2021, subject to any changes that may result from successful HHS-RADV discrepancies or related appeals.

If an issuer does not have enrollment in a state market risk pool, and thus, does not have a risk adjustment transfer in that risk pool, the issuer is not included in the applicable risk pool table(s) below.

“\$0.00”: We signify \$0.00 for issuers where there is no adjustment being made because there are no error rates in the state market risk pool.

Table 2a: Issuer-Specific 2017 HHS-RADV Adjustments to 2018 Risk Adjustment Transfers for Non-Merged Market States – Individual, Non-Catastrophic Market (Appendix A)

Issuer-Specific 2017 HHS-RADV Adjustments to 2018 Risk Adjustment Transfers for Merged Market States

Vermont and Massachusetts are the only states considered to have merged markets for purposes of the HHS-operated risk adjustment program.²² As set forth in the 2020 Payment Notice,²³ we exercised enforcement discretion to provide Massachusetts issuers²⁴ with a non-adjustment pilot year for the 2017 HHS-RADV. Therefore, while Massachusetts issuers received the 2017 benefit year HHS-RADV error rate results, these issuers will not have their plan liability risk scores or transfers for Massachusetts state market risk pools adjusted based on the 2017 benefit year HHS-RADV results. In addition, as described in the HHS-RADV 2017 Benefit Year Final Results Memo, Massachusetts issuers' failure rates were excluded from the calculation of the national program benchmarks for the 2017 benefit year HHS-RADV to avoid potential distortion in the national metrics. Therefore, Vermont is only the merged market included in the 2017 HHS-RADV results and only Vermont's issuers are included in Table 3 for the 2017 benefit year HHS-RADV adjustments to 2018 benefit year risk adjustment transfer calculations.

²² See https://www.regtap.info/uploads/library/RA_GuidanceMergedMarkets2017_030118_5CR_030118.pdf.

²³ See 84 FR at 17508 – 17509.

²⁴ Participation in HHS-RADV is based on HIOS IDs and not parent companies. Therefore while some issuers' parent companies in Massachusetts may have previously participated in HHS-RADV in other states under other issuer HIOS IDs, no issuer HIOS IDs in Massachusetts previously participated in the HHS-operated risk adjustment program, including the pilot years of HHS-RADV.

“\$0.00”: We signify \$0.00 for issuers where there is no adjustment being made because there are no error rates in the state market risk pool.

²⁵ Massachusetts and Vermont are considered to have a merged market for purposes of the risk adjustment program. See https://www.regtap.info/uploads/library/RA_GuidanceMergedMarkets2017_030118_5CR_030118.pdf. Table 3 only includes Vermont issuers for 2017 benefit year HHS-RADV adjustments to 2018 benefit year risk adjustment transfer calculations, as applicable. As described earlier in this report, 2017 benefit year HHS-RADV is a pilot year for Massachusetts issuers.

²⁶ The Summary Report on Permanent Risk Adjustment Transfers for the 2018 Benefit Year for can be found at: <https://www.cms.gov/CCIIO/Programs-and-Initiatives/Premium-Stabilization-Programs/Downloads/Summary-Report-Risk-Adjustment-2018.pdf>.

IV. Exiting Issuers and Issuer-Specific Adjustments to 2017 Benefit Year Risk Adjustment Transfers Based on 2017 Benefit Year HHS-RADV Results

Below we set forth the 2017 benefit year risk adjustment transfer amounts adjusted to reflect exiting issuers' 2017 benefit year HHS-RADV results. For the 2017 benefit year HHS-RADV, issuers that exited all of the market risk pools in the state for the 2018 benefit year risk adjustment²⁸ that had a non-zero risk score error rate (i.e., that are identified as outliers) resulted in an adjustment to 2017 benefit year risk scores and risk adjustment transfers in those state market risk pools.²⁹ The adjustment amounts are the amounts that will be collected and paid in calendar year 2021, subject to any changes that result from successful HHS-RADV discrepancies or related appeals.

These 2017 HHS-RADV error rates were applied to the issuers' 2017 benefit year plan level risk scores, which then were used to calculate the adjusted 2017 risk adjustment transfers in the affected state market risk pools. Therefore, we applied the 2017 HHS-RADV error rates for exiting issuers by completing the following:

1. $\text{RADV Error Rate} * \text{BY2017 Risk Score without RADV Adjustment} = X$
2. $\text{BY2017 Risk Score without RADV Adjustment} - X = \text{BY2017 Risk Score with RADV Adjustment}$

Then, we used the new risk scores (BY2017 Risk Score with RADV Adjustment) in the transfer calculation to determine the RADV adjusted transfer amount. Please see the July 23, 2019 webinar titled, "EDGE Server 32.0 Maintenance Release Preview & Review of 8/1/19 Risk Adjustment (RA) Reports with RA Data Validation (RADV) Adjustments to Transfers," for more information.³⁰

These adjustment amounts represent the difference between issuers' risk adjustment transfers and the adjusted transfer amount due to HHS-RADV.

If an issuer does not have enrollment in a state market risk pool, and thus, does not have a risk adjustment transfer in that risk pool, the issuer is not included in the applicable risk pool table(s) below.

²⁸ As noted earlier in the report, we were predicting that 85 issuers exited all state markets in the 2018 benefit year and had non-zero error rates. We subsequently found that some of these issuers did not exit all state risk pools and therefore their 2017 benefit year HHS-RADV results were applied to the 2018 benefit year risk adjustment transfers.

²⁹ As finalized in the 2020 Payment Notice (84 FR 17454 at 17503) for the 2018 benefit years HHS-RADV and beyond, only those exiting issuers who are identified as having a positive risk score error rate outlier will be adjusted.

³⁰ Available at: https://www.regtap.info/uploads/library/RA_EDGE_32_Preview_RA_Transfer_072319_5CR_072519.pdf.

“\$0.00”: We signify \$0.00 for issuers where there is no adjustment being made because there are no error rates in the state market risk pool.

We do not provide any tables related to the 2017 HHS-RADV adjustments to 2017 risk adjustment transfers for merged market states as there were no outliers in Vermont and therefore no adjustments to 2017 benefit year transfers.³¹

V. Default Data Validation Charge

Pursuant to 45 C.F.R. § 153.630(b)(10), HHS will assess a default data validation charge if an issuer of a risk adjustment covered plan fails to engage an initial validation auditor or submit the results of an initial validation audit to HHS. The default data validation

charge generally utilizes the same calculation methodology as the risk adjustment default charge.³⁵ As indicated in the 2020 Payment Notice, HHS will not collect and distribute the 2017 benefit year default data validation charges and payment allocations until the 2021 calendar year.³⁶

The total default data validation charge for a risk adjustment covered plan equals a per-member per-month (PMPM) amount multiplied by the plan’s enrollment – either provided by the issuer or sought from other reliable sources when issuer-reported data was not available. HHS will use enrollment numbers from the benefit year being audited for purposes of calculating the default data validation charge. The PMPM charge for a plan is equal to the product of the statewide average premium PMPM for a risk pool and the 90th percentile plan risk transfer amount for the benefit year of risk adjustment data validation, expressed as a percentage of the respective statewide average PMPM premiums for the risk pool. The nationwide percentile only reflects plans in states where HHS is operating the risk adjustment program and is calculated based on the absolute value of plan risk transfer amounts. The determined PMPM amount is then multiplied by the noncompliant plan’s enrollment to establish the plan’s total default data validation charge.

All compliant and exempt risk adjustment covered plans in the state market risk pool of at least one noncompliant issuer will receive a portion of the default data validation charges collected from the noncompliant issuer(s). We allocate default data validation charges collected from noncompliant plans in the state market risk pool among the compliant and exempt plans in the state market risk pool in the applicable benefit year in a manner that is proportional to each compliant or exempt plan’s relative revenue requirement, as calculated under the transfer formula relative to the market average of these products.³⁷ For the 2017 benefit year HHS-RADV, the default data validation charge uses 2017 benefit year risk adjustment data. Below we set forth information on the 2017 benefit year default data validation charges which will apply to the 2017 benefit year of HHS-RADV.

Table 5: HHS Default Data Validation Charge Summary Data

SUMMARY DATA ELEMENT	TOTALS
Number of Issuers Receiving a Default Data Validation Charge	2
Percent of All Issuers of Risk Adjustment Covered Plans Subject to 2017 Benefit Year HHS-RADV that Received a Default Data Validation Charge	0.34%

³⁵ The default data validation charge is calculated in the same manner as the risk adjustment default charge under 45 C.F.R. § 153.740(b) except that the default data validation charge is based on enrollment for the benefit year being audited. See the 2020 Payment Notice, 84 FR at 17495 – 17497.

³⁶ See 84 FR at 17506 – 17507.

³⁷ For issuers owed a default data validation charge allocation payment amount (or any payment amount) that is less than \$1.00, CMS will hold payment until after the release of sequestration funds after fiscal year 2021, so that issuers can receive the full amount (pending collections).

VI. HHS- Operated Risk Adjustment Program State-Specific Data (Appendix F)

In *Appendix F*, we set forth the risk adjustment state averages after application of 2017 benefit year HHS-RADV error rates with billable member months for the 2018 benefit year. In *Appendix G*, we set forth the risk adjustment state averages after application of 2017 benefit year HHS-RADV error rates with billable member months for the 2017 benefit year. *Appendices F* and *G* include the following data elements after application of the 2017 benefit year HHS-RADV error rates: state average monthly premiums by state market risk pool (catastrophic, individual non-catastrophic, small group, and merged), the state average plan liability risk score by state market risk pool, state average allowable rating factor by state market risk pool, state average actuarial value by state market risk pool, state average induced demand factor by state market risk pool, and billable member months for each respective benefit year. We note that some data elements in *Appendices F* and *G* may not match the state risk pool averages found in issuers’ system generated reports or transfers in state risk pools that had a material discrepancy resulting in payment adjustments after the calculation of risk adjustment transfers. We also provide a description below of the calculations for state average premium, state average plan liability risk score, state average allowable rating factor, state average actuarial value, state average induced demand factor, and billable member months.

DATA ELEMENT	DESCRIPTION
State Average Monthly Premium	The state average premium for state market risk pool is the weighted average monthly premium for the state market risk pool, weighted by plan share of statewide enrollment in the state market risk pool. Beginning in the 2018 benefit year, a 14 percent administrative cost adjustment is applied to the state average monthly premium. This value is used in the state payment transfer formula calculations for risk adjustment payments and charges.

DATA ELEMENT	DESCRIPTION
State Average Monthly Premium Before Adjustment	The state average premium for state market risk pool is the weighted average monthly premium for the state market risk pool, weighted by plan share of statewide enrollment in the state market risk pool before the 14 percent administrative cost adjustment is applied. This value is for informational purposes only and not used in the calculation of risk adjustment payments and charges.
State Average Plan Liability Risk Score (PLRS)	The state average PLRS is calculated as the summed products of PLRS and billable member months for all plans within the state market risk pool divided by total billable months for all plans within the state market risk pool.
State Average Allowable Rating Factor (ARF)	The state average ARF is calculated as the summed products of ARF and billable member months for the plans within the state market risk pool divided by total billable member months for all plans in the state market risk pool.
State Average Actuarial Value (AV)	<p>The state average AV is calculated as the summed products of AV and billable member months for the plans within the state market risk pool divided by the total billable member months within the state market risk pool. AV corresponds with metal and catastrophic tiers as follows:</p> <ul style="list-style-type: none"> * Catastrophic: 0.57 * Bronze: 0.60 * Silver: 0.70 * Gold: 0.80 *Platinum: 0.90
State Average Induced Demand Factor (IDF)	<p>The state average IDF is calculated as the summed products of IDF and billable member months for the plans within the state market risk pool divided by the total billable member months within the state market risk pool. IDF corresponds with metal and catastrophic tiers as follows:</p> <ul style="list-style-type: none"> *Catastrophic: 1.00 *Bronze: 1.00 *Silver: 1.03 *Gold: 1.08 *Platinum: 1.15
Billable Member Months	Billable member months are the member months of an individual or family policy that are included when setting the policy's premium rate.
